Our Mission

Mundo Sostenible works with local and international partners to fund and implement clean energy projects to foster **economic growth** in an **environmentally** and **socially sustainable** way.

Nuestra Energía

To install small- to medium-scale solar energy projects at orphanages, shelters, care homes, clinics, schools, and other community-focused facilities. The transition to solar energy reduces operating costs and greenhouse gas emissions so that these facilities can focus their resources on their core mission.

Eco-Escuela Simataucca

Simataucca, Cusco
5.28kW

Intita Rikuchiway

To install medium- to large-scale solar energy projects at schools, universities, and hospitals to bolster economic development in Peru and beyond!
